Worked example:
Gaelic speakers

Computer & Information Sciences

W. H. Bell

Background

- The Scottish government perform a census and publish the data online.

- The available data includes a range of observables, including information on Gaelic speakers.

- Data are provided for different area sizes, including electoral wards.

Requirements

- Read the Gaelic language data for all electoral wards.

- Find top three Gaelic speaking areas:

- In terms of total population.

- In terms of the relative number of speakers.
